WHY?

The health sectors of many developing countries rely significantly on donations of medical devices and equipment from abroad. For over 30 years, Hearts In Motion has been helping get critical supplies to people in need across the globe with a primary focus in Central and South America, but it has sent shipments to Lebanon and Ukraine.

Hearts In Motion receives millions of dollars worth of donations of physical, occupational, speech, and other healthcare equipment annually from vendors nationwide - and our warehouse is overflowing; we need your help to get it to those who need it most soon!

Hearts In Motion works closely with our donors of healthcare supplies to ensure we receive equipment in good working order, relevant to the location to where we are shipping; items are non-expired; coordinate directly with community leaders to identify the most pressing needs and use a packing/unpacking process to ensure the items to get to the right people at the right time.

Supplies ready to be shipped:

- Crutches to help children and adults with broken limbs walk
- Machines to help diagnose sick patients
- Wheelchairs to give mobility to the elderly and disabled
- Walkers to help patients during physical therapy and at home
- Specialized braces

Here's how you can help:

- Make a monetary donation at heartsinmotion.org/Container
 - A donation of \$10 helps to ship \$170+ worth of equipment!
- Start up a Facebook or Instagram Fundraiser for Hearts In Motion
- Share our digital flier across your networks
- Follow us on Social Media and like and share our posts

Hearts In Motion is a 501c3 nonprofit and your donation is tax-deductible.
